TRAINING AND EVENTS

SERVICING OUR UTILITIES SECTOR

Utilising great space...

At Wyboston Lakes Resort we are proud to be associated with the Utilities sector. We have held some major events for leading organisations boasting a good track record with many well-known brands.

Wyboston Lakes Resort is situated midway between Cambridge and Milton Keynes and set in 380 acres of rural countryside, less than one hour from London.

Our two dedicated venues have over 50 meeting rooms including two large conference rooms for up to 600 delegates. All the rooms have wonderful natural light, high ceilings, air-conditioning and superb technology.

Between the two venues we have a total of 303 comfortable and well equipped bedrooms offering delegates somewhere comfortable after a long day.

Users of both venues can enjoy 1.3Gb of shared free Wi-Fi along with sector leading AV and Tech capabilities, including multiscreen capability, tablet connectivity, wireless presentations, Blu-Ray player and Crestron Touch Panel controls. All of this is supported by our on-site tech team to deliver memorable events confidently.

It is the diversity and flexibility of the two venues that allows us to deliver the very broad style of events that take place within the utilities sector; from basic training programmes, to the senior management training, with large group accommodation facilities and long term space available.

Whilst Wyboston Lakes has been established for many years as the UK's largest privately owned single site specialist conference and training venue, the quality of its facilities and the overall services have been recently enhanced to ensure we are leading the way in this sector.

"E2BN have been using Wyboston Lakes Resort for over a decade now. In that time they have listened to our needs and upgraded their internet provision to give the service we need. We have over 300 delegates (all with tablets, phones and laptops connecting to the internet) with an additional 70 exhibitors plus numerous workshops running, all using the internet or streaming live events and it works." Chris Kastel at E2BN.
