

# Case Study: GPF Lewis

Completed in just 12 weeks, the Willows Training Centre in Wyboston Lakes was transformed by our Projects Team who carried out the complete refurbishment of the training rooms, bars, restaurant, reception, games room and bathrooms.

The team are delighted with the results and pleased to handover the project to our client which was completed within the agreed programme. The work consisted of a complete strip out of all areas and construction of new internal walls and ceilings bulkheads, installation of wall panelling, joinery, cladding, glazed partitions and servery units.

The striking designs were completed by our decorators after the flooring and tiling works were completed. The team worked alongside other contractors who installed the new furniture to complete the renovation.
