

WYBOSTON LAKES RESORT

More Sustainable. No Apology.

measuring event sustainability

Wyboston Lakes Resort is delighted to offer you the ability to measure and report on the sustainability of your own event with event:decision.

Understanding the impact of your event is a simple, cost-effective process which supports your organisational sustainability goals.

You can help reduce your meeting or event carbon footprint if measured in advance, making more sustainable planning decisions.

Track, from **event:decision** will show you:

- your overall event footprint
- how you compare with other events
- how best to mitigate your footprint
- potential offset value

Calculating your carbon footprint is a great first step for a business of any size looking to understand your environmental impact.

Contact Wyboston Lakes or the event:decision team for further information.
