

# JUST EAT

Just Eat are a technology focused company that provides delivery service to fast food restaurants up and down the country.

With over 67,000 restaurant partners and 100+ cuisine types available to over 17 million customers worldwide, Just Eat offers incredible choice catering to every taste, mood, occasion and budget.

## THE CHALLENGE

Just Eat had certain requirements for their National Conference in order to make it exceptional.

- They needed outdoor team building facilities with a range of activities.
- Equally that had to have a conference and meeting space with room for various projects to be undertaken at the same time.
- The venue had to have a reputation for high standard food and forward thinking technology due to these being the focus areas of Just Eat.
- A fun atmosphere for the evening was crucial for delegates to relax and connect.
- They required a contained space so that delegates did not have to travel far between activities.

## THE SOLUTION

Our Training Centre offered exactly what Just Eat needed for their annual conference. Using our Willows conference room, 4 training rooms and 2 syndicate rooms we were able to provide plenty of space.

Our onsite Ride Leisure facility is perfect for all sorts of outdoor team building and with a 3 minute coach journey it's easily accessible. Our Willows restaurant was able to provide the high quality food required and our Audio-Visual team more than happy to work with the technology required by Just Eat. Each evening the restaurant offers a themed menu with casual dining experience giving the company the ability to kick back and have a good time.
